

CLIMATE RESILIENCE OF MICRO, SMALL & MEDIUM INDUSTRIAL WORKPLACES

Workshop Wrap Up

Rokia Raslan UCL IEDE

Wrap Up

- Over 70 applications to join from both the UK & Egypt from over 60 universities research establishments
- 8 delivery team members, 4 mentors as well as panelists
- Collaborations between 2 leading academic institutions with input from a further 2 other universities
- Input from a diverse set of stakeholders

Workshop Aims & Overview

- To bring together UK & Egypt early career researchers (ECRs) with experts to address the challenge of retrofitting Egypt's MSM industrial workplaces
- Deliver co-produced strategies to achieve this & have the opportunity to win funding to support your own Challenge Prize project.

Longer term goals are to:

- Support international development-relevant research on climate change
- Contribute to the capacity building of ECRs
- Establish research links with long-term sustainability

Workshop Aims & Overview

- To bring together UK & Egypt early career researchers (ECRs) with experts to address the challenge of retrofitting Egypt's MSM industrial workplaces
- Deliver co-produced strategies to achieve this & have the opportunity to win funding to support your own Challenge Prize project.

Longer term goals are to:

- Support international development-relevant research on climate change
- Contribute to the capacity building of ECRs
- Establish research links with long-term sustainability

Support & Resources: Challenge Prize

- Challenge Prize area will have information & guidelines
- All slides/Boards will be uploaded/translated for participants
- Website Knowledge Bank areas has resources <https://cresmi.org/knowledge-bank/>
- A Challenge Prize reading list will be made available
- All participants will be invited to the CRESMI forum
- Teams can check their eligibility in advance of submission with workshop organisers
- Teams are welcome to discuss their research idea for the Challenge Prize

Support & Resources: Long Term Goals

- Support international development-relevant research on climate change:

Announcement: UK-Egypt climate resilience in buildings research network

- Contribute to the capacity building of ECRs

Access to a CRESMI Forum

CRESMI Mailing list for opportunities

- Establish research links with long-term sustainability

Challenge Prize

UCL & AUC research partnership for international research grants

Support & Resources: Engagement

- RLCC is taking place as part of the British Council's Climate Connection programme.
- Aims to bring people around the world together to meet the challenges of climate change.
- Showcase outcomes on the RLCC website to help feed into the broader aims of The Climate Connection & help inspire global audiences.
- Types of content include:
 - Interviews/blog posts with Principal Investigator &/or workshop participants &/or challenge prize winners
 - Video content & images
 - E-booklet including case studies
